

Sani-Defense

A powerful disinfection service

Sani-Defense

Disinfects to Protect

The CDC is currently recommending to disinfect high touch points, like washrooms, boardrooms, offices, reception area, gyms and more using a hospital grade disinfectant like Virudex-7. Citron Hygiene has the ability to disinfect large areas to control outbreak and eliminate contaminated spaces.

Leaving Your Facility Disinfected

Added Protection

Sani-Defense minimizes the danger posed by microscopic germs, viruses, and bacteria that can create health hazards for your workers and customers.

Virudex-7 DIN is effective against Poliovirus Type 1 and Canine Parvovirus and likely to kill the SARS-CoV-2 (the virus that causes COVID-19).

Maximum Coverage

The Sani-Defense Service and formulation will disinfect hard, non-porous surfaces such as floors, walls, metal surfaces, stainless steel surfaces, porcelain, glazed ceramic tile, plastic surfaces, washrooms, shower stalls and cabinets. Citron Hygiene technicians spray micro-droplets of Hospital-Grade Disinfectant into the air that falls onto exposed surfaces and objects.

Peace of Mind

Current evidence suggests that viruses such as Covid-19 may remain viable for up to 72 hours on surfaces. Ensure your employees, customers and guests are protected. Using a hospital grade disinfectant such as Virudex-7 is the best practice for prevention. Ensure your employees, customers and guests are protected.
